WORLDWIDE PATENT PENDING

High Visibility Deflectors to Protect Pallet Rack Uprights against Pallet Impacts.

High Visibility Pallet Deflectors

- Designed to mitigate the effect of pallet impacts against rear and front pallet racking uprights.
- Reduces rack maintenance and rear upright damage by up to 90%.
- Affordable prices and Quick Installation.
- Made from injection molded, high-impact plastic compound with energy absorbing properties.
- The safety yellow colour ensures high visibility, enhancing the forklift driver's ability to identify the upright's location.
- Available in two models: The AX115 for the rear uprights of pallet racks, and the AX140 for front uprights with protectors.
- The AX115 for rear upright has a 115mm internal diameter and height of 120mm, allowing ample room to be placed over the anchoring footplate of the upright and within the anchor bolts.
- The AX140 for the front upright has a 140mm internal diameter and height of 120mm, and is placed around the front upright mounted with Visipro Pallet Rack Protector of sizes AVS1, AVS2, AVA, AVB or AVC.

High Visibility Bollards

- A bollard is a sturdy vertical post installed for protection in strategic locations in your working area, including doorways and other high traffic zones indoors as well as outdoors.
- These bollards are made from segmented sections which are designed to spin and mitigate the impact energy out of collisions.
- Zero maintenance feature.
- Doesn't have edges and sharp corners.
- Resistant to corrosive environments.
- Good impact mitigating properties.
- High visibility due to its colour.
- Easy to assemble.
- No painting required as the plastic is pre coloured in bright yellow colour.
- Easy to clean.

Visipro Bollard consist of :

- AVBCP 460 x 140 (Bollard Core Pipe) : 1No.
- AX140 (Visipro Pallet Deflector) : 8 pcs.
- AXBCLPS (Bollard locking pin Small) : 6 Nos.
