Over the years storage/warehousing customers were looking for a large bin which could give them easy frontal access to the contents stored in the bin and also save their valuable space.

We at Alkon after interacting with our esteemed customers learnt that since no such bin was available they were forced to use a crate as a picking bin thereby sacrificing on vertical storage space as the crate being a box having solid walls on all four sides, permits access only from top. Due to this nearly 50% more open space is needed between the shelves to store and retrieve the goods.

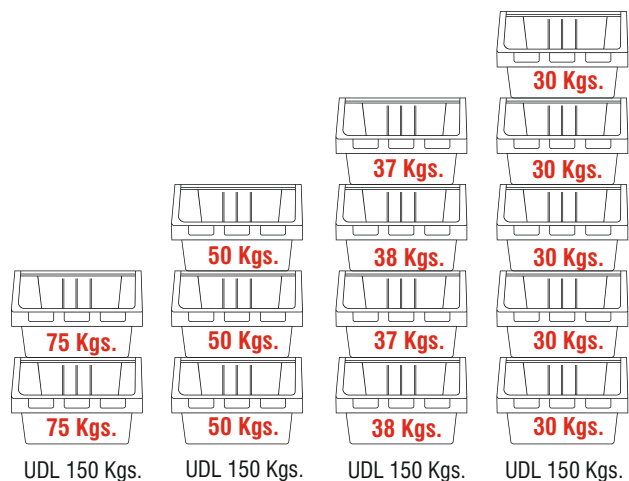

At places to create frontal access and save vertical space between the shelves, the customers were using FPO crates "front partially open crates" by cutting a square on the one side of the crate which is a non standard conversion. It is not an effective storage solution.

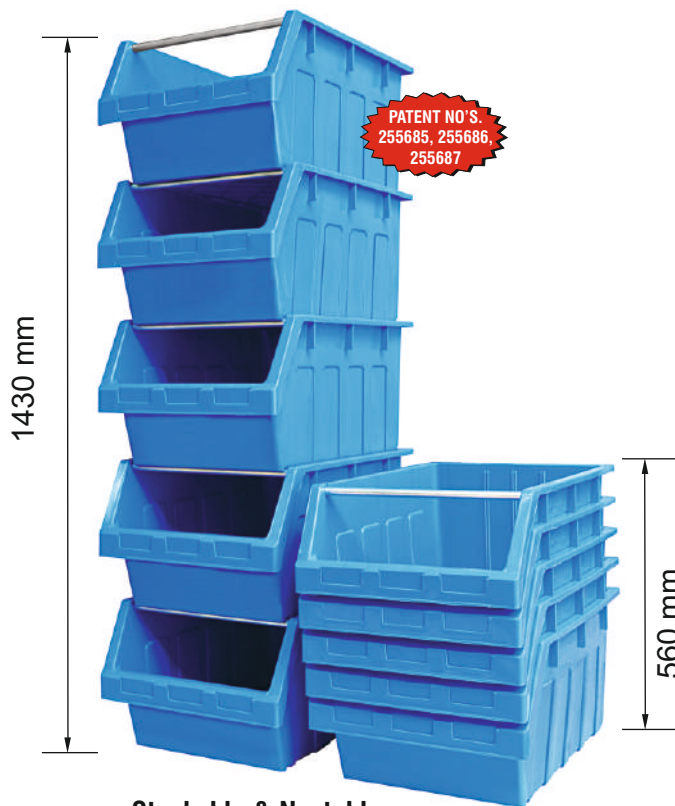

To suit the needs of the customer and to give optimum space utility we hereby introduce **ALKON SUPRA BIN SB 8**, a bin which creates a new dimension in storage.

**Supra Bin SB-8** designed to suit the Versatile needs of the customer and to give optimum space utility.

- ▶ Bin with **largest** effective height of **170 mm**.
- ▶ Bin can be stacked so you can effectively use maximum storage as compared to a single crate on a shelf and you don't need to keep any free over head space.
- ▶ If stacked on the shelf one can effectively used maximum storage if compared with crates.
- ▶ Clear frontal access to the contents of the bin in stacked condition.
- ▶ Bin has large label holders for effective sku identification.
- ▶ Dividers are available for the bin which can divide the bin in 2 or 3 equal parts for more effective storage.
- ▶ Bin has strong heavy duty reinforced base for added strength and load bearing.
- ▶ Rounded ergonomic design having strong sides and stacking rim gives extra strength and sturdiness for storage.
- ▶ Resistance to most industrial solvents, withstands high temperatures.
- ▶ Aluminium pipe fitted with lock pins on either side prevent the mouth of the bin from spreading under load conditions.

## UNIVERSAL RAIL : AUR-1

Universal rail ( SIZE : 915 mm L X 60 mm H ) made from steel and powder coated in grey color Can be mounted on any surface like walls, benches, slotted angle systems, stands, and trolleys. These rails increase the flexibility of using different sizes of bins with ease and help in optimizing Storage space.

The added feature of this rail is that when you use multiple rail one below each other from the second rail onwards the top part of the

rail can be used as a support to the lower part of the bin mounted on the above rail and the bottom part of the rail can be used to mount the bin and so on, this helps in using lesser number of rails in the case when bins of height more than 130mm are used.

## UNIVERSAL RAIL : AUR-1

Universal rail ( size 915 mm L x 60 mm H ) made from steel and powder coated in Grey colour can be mounted on any surface like Walls, Benches, Slotted angle systems, Stands, and Trolleys. These rails increase the flexibility of using different sizes of bins with ease and help in optimizing storage space. The added feature of this rail is that when you use multiple rail one below each other from the second rail onwards the top part of the rail can be used as a support to the lower part of the bin mounted on the above rail and the bottom part of the rail can be used to mount the bin and so on, this helps in using lesser number of rails in the case when bins of height more than 130mm are used.

Universal rail ( SIZE 915 MM L X 60 MM H ) made from steel and powder coated in grey color Can be mounted on any surface like walls, benches, slotted angle systems, stands, and trolleys. These rails increase the flexibility of using different sizes of bins with ease and help in optimizing Storage space. The added feature of this rail is that when you use multiple rail one below each other from the second rail onwards the top part of the rail can be used as a support to the lower part of the bin mounted on the above rail and the bottom part of the rail can be used to mount the bin and so on, this helps in using lesser number of rails in the case when bins of height more than 130mm are used.

## UNIVERSAL RAIL : AUR-1

Universal rail ( SIZE 915 mm L X 60 mm H ) made from steel and powder coated in grey color can be mounted on any surface like walls, benches, slotted angle systems, stands, and trolleys. These rails increase the flexibility of using different sizes of bins with ease and help in optimizing storage space. The added feature of this rail is that when you use multiple rail one below each other from the second rail onwards the top part of the rail can be used as a support to the lower part of the bin mounted on the above rail and the bottom part of the rail can be used to mount the bin and so on, this helps in using lesser number of rails in the case when bins of height more than 130mm are used.
